

Republic of Yulakia

Where Sea Embraces Mountains, Sunflowers Bloom in Unity.

YULAKIA

Where Sea Embraces Mountains, Sunflowers Bloom in Unity.

Lore / Story

[Flag of Yulakia]

Geography

Nestled in the heart of Eastern Europe, the Republic of Yulakia spans approximately 164 square kilometers of diverse terrain. Its landscape is characterized by sprawling plains, dense forests, and rugged mountains, offering both strategic advantages and challenges to its inhabitants and visitors.

Population

The population of the Republic of Yulakia stands at an estimated 95,000 people, comprising a rich tapestry of ethnicities, cultures, and traditions. The majority of the population resides in urban centers, with the capital city, Mazemovo, serving as the political, economic, and cultural hub of the nation of West Yulakia. Eastern Yulakia capital city is Yurievgrad.

Government

The Republic of West Yulakia operates under a democratic system of governance, with President **Vissim I. Dokolenko** at the helm. Known for his astute leadership and unwavering dedication to the welfare of his people, President Dokolenko has steered the nation through tumultuous times with grace and resilience. Alongside him stands his fiancée, **Arianna Nakolenka**, whose intellect and charisma have earned her widespread admiration among the populace.

Military

The Yulakian Armed Forces comprise a formidable presence within the region, with a total personnel strength of **4,750 troops**. Strategically positioned military installations dot the landscape, ranging from fortified border outposts to state-of-the-art training facilities. In addition to its ground forces, the nation boasts a capable air force and navy, equipped with modern aircraft and naval vessels to safeguard its sovereignty. Eastern Yulakia is upgrading its military strength with the help of Russia and separatist appetites for control of Capital City of Mazemovo and its surrounding cities are becoming substantial. Not a week goes by that a new Russian transport ship arrives at docks on Eastern Coast or a big transport plane lands at Shakal Military Base.

Historical Conflict

The Republic of Yulakia bears the scars of a bitter decade-long conflict that ravaged the nation in the 1990s. Fueled by political unrest and ethnic tensions, the war tore through the fabric of Yulakian society, leaving a legacy of division and distrust in its wake. The conflict culminated in the division of the nation along the winding course of the Mazovka River, with the eastern territories falling under the influence of Russia, while the western regions aligned with the Western Nations.

Economy

Despite the lingering effects of conflict, the economy of the Republic of Yulakia has experienced steady growth in recent years, driven by robust sectors such as agriculture, manufacturing, and technology. The nation's natural resources, including fertile farmland and mineral deposits, serve as pillars of its economic prosperity, while investments in infrastructure and innovation continue to fuel its development. Recent oil findings in Northeast Yulakia under separatists control fuelled more appetites to explore the land and maybe provoke a new conflict with newly gathered appetites. Eastern Yulakia is currently also receiving income for tourist visits to Victorin - the biggest cave system in the region. A border river runs right through the cave with Eastern entrance way more accessible due to the natural structural design of the cave.
